Network Usage Policy FAQ's

1. **What computers can I use on campus?**

   Computers may be accessed by students, visiting instructors, and staff in the Learning Resource Center.

   Instructor computers in each classroom should only be utilized by the instructor for official purposes.

2. **Can I use the computers in the computer lab?**

   Computers located in classrooms 9 and 15 may only be used by students enrolled in a course utilizing the computer lab.

   All others should access the computers in the library.

3. **Can I download a program to computers owned by the North Carolina Justice Academy?**

   No, downloads of software are not authorized. Instructors who have an official need must consult with IT personnel and receive authorization.

4. **Can I change the configuration of a computer owned by the North Carolina Justice Academy?**

   No.

5. **I download movies or music at home using Peer 2 Peer (Torrent) software why can't I do it here?**

   No matter where you are located when you download these copyrighted items it is still a Felony. Violation of this section of the usage policy will result in immediate action.

6. **I received the sign in code, but I still cannot access the internet?**

   IP addresses for the network are limited. If a maximum number of users are already signed in you may not be granted access.

   Configuration of your computer may restrict your access to the network.

7. **How can I tell whether my Internet activity is inappropriate?**

   Inappropriate Websites:
   Adult sites containing pornographic content Gambling
   sites (online casinos)
   Sites hosting or promoting illegal copies of copyrighted material (music, video, software download sites)

8. **What specific types of programs are not allowed on the NCJA network?**

   If your computer has the following types of applications installed, we ask that you *uninstall* them before accessing the NCJA network.

   - Peer-to-peer (P2P) or other music/video file sharing programs
   - Voice calls over Internet software (Skype, Vonage etc.)

Network Usage Policy FAQ's

Examples of P2P programs and services which are forbidden:

This is not a complete list. Many more P2P programs and websites may be found on the Internet. It is your responsibility to recognize whether your application uses P2P file sharing protocols and to uninstall it from your computer before accessing the NCJA network.
